

**143605. LATHYRUS APHACA L.****Pea.**

No. 8021. A semiprostrate or ascending yellow-flowered herb, native to Asia Minor.

For previous introduction see 123446.

**143606. LONICERA ARBOREA var. PERSICA (Jaub. and Spach) Rehder. Caprifoliaceae.**

No. 8076. A dense bush 6 feet high; flowers white, washed with rose purple; fruit milky white, translucent, eaten by birds; grows on dry slopes with ground-water probably available.

**143607. MERENDERA sp. Melanthiaceae.**

No. 7999. Plant semirhizomatous, crocus-flowered; flowers rose, strap-leaved, blooming very early in wet places that later dry.

**143608. MUSCARI sp. Liliaceae.**

No. 7988. Plant 6 inches high; found at 8,000 feet altitude; flowers few, green, blue.

**143609. MUSCARI sp.**

No. 8004. Rare species; spike 2 feet high; buds purplish, opening greenish brown.

**143610. MUSCARI sp.**

No. 8008. Field species; spike 2 feet high; flowers greenish; bud purplish.

**143611. MUSCARI sp.**

No. 8014. Tall species 2 feet high; spike full, flowers purple buds opening greenish.

**143612. MUSCARI sp.**

No. 8027. Broadleaved species, similar to garden species cultivated in the United States, but with larger and fragrant flowers; requires much water.

**143613. MUSCARI sp.**

No. 8037. Early-flowering species; spike open; buds purple, opening greenish.

**143614. ORNITHOGALUM sp. Liliaceae.**

No. 7997. Large open corymb, 8 inches high, of white, green-ribbed flowers.

**143615. ORNITHOGALUM sp.**

No. 8020. Spike 3 feet high; flowers green-ribbed.

**143616. ORNITHOGALUM sp.**

No. 8091. Plant 4 feet high, with dense spike of cream flowers.

**143617. PAPAVER sp. Papaveraceae.**

No. 7998. An annual about 2 feet high, bearing large poppy-red black-centered flowers.

**143618. PAPAVER sp.**

No. 8032. An annual about 18 inches high, with attractive cerise flowers.

**143619. PAPAVER sp.**

No. 8040. A poppylike annual; flowers cerise.

**143620. PELTARIA ANGUSTIFOLIA DC. Brassicaceae.**

No. 8033. A perennial crucifer, with showy dense corymbs of small, white flowers.

**143621. PHLOMIS sp. Menthaceae.**

No. 8059. Clumps; 2 feet high; flowers large, beautiful pink, very attractive; perennial.

Nos. 143622 to 143624 were collected in Maraghe, Azerbaijan, November 28, 1940.
